Spinor Wikipedia

February 18th, 2019 - What characterizes spinors and distinguishes them from geometric vectors and other tensors is subtle Consider applying a rotation to the coordinates of a system No object in the system itself has moved only the coordinates have so there will always be a compensating change in those coordinate values when applied to any object of the system

Bell s theorem Wikipedia

February 17th, 2019 - Bell s theorem is a no go theorem that draws an important distinction between quantum mechanics and the world as described by classical mechanics particularly concerning quantum entanglement where two or more particles in a quantum state continue to be mutually dependent even at large physical separations This theorem is named after John Stewart Bell
